CAREER OBJECTIVE

Data Science graduate with strong foundations in **Python, SQL, Machine Learning, Data Analysis and Data Visualization**, along with **hands-on experience in data preprocessing, exploratory data analysis, dashboard development, and predictive modeling** through academic projects and internship work. Passionate about **transforming raw data into actionable insights and building data-driven solutions**. Seeking an entry-level opportunity in **Data Science, Machine Learning, or Data Analytics** to contribute analytical skills, problem-solving ability, and a strong learning mindset to real-world business challenges.

EDUCATION

B.Tech in Computer Science and Engineering - Data Science

2022- 2026

Brainware University , West Bengal

CGPA - 8.91

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Database Systems:** MySQL, DBMS Fundamentals, Joins, Subqueries, Aggregations
- **Data Analytics:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Pandas, NumPy
- **Data Visualization / BI :** Matplotlib, Seaborn, Power BI
- **Machine Learning:** Scikit-learn, Predictive Modeling, Feature Engineering
- **Core Concepts:** Data Analytics & Visualization, Machine Learning Fundamentals
- **Tools:** Jupyter Notebook, Streamlit, Pickle

PROJECTS

Predicting Employee Layoff Risk in the Age of AI

June '2026 - Present

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on historical workforce data to identify patterns, trends, and potential indicators associated with employee layoff risk.
- Handled missing values, inconsistencies, and feature preparation to make the dataset suitable for machine learning analysis, while applying statistical analysis and visualizations to examine relationships between employee-related factors and layoff outcomes.
- Built a foundation for a predictive machine learning workflow by preparing structured features for future model development and evaluation.
- **Technologies used:** Python, Pandas, Numpy, Matplotlib, Seaborn, Jupyter Notebook.

AI-Powered Sales and Demand Forecasting System

Feb - April '2026

- Developed a machine learning-based forecasting system to predict future sales and demand trends from historical business data, using data preprocessing, feature preparation, and exploratory analysis to improve data quality and support model training.

- Built and tested forecasting workflows using Python, Scikit-learn, and XGBoost for predictive modeling and trend analysis.
- Designed an interactive Streamlit web application for real-time prediction and visualization, and used Pickle for model serialization to support reusable deployment of the trained model.
- **Technologies used:** Python, Pandas, NumPy, Matplotlib, Scikit-learn, XGBoost, Streamlit, Pickle, Jupyter Notebook

Adidas United States Sales Data Analytics

Nov - Dec '2025

- Analyzed sales performance data to identify trends across products, regions, and business segments, supported by data cleaning and transformation for structured reporting and analysis.
- Built interactive Power BI dashboards to track key sales metrics, regional performance, and category-wise insights.
- Delivered analytical insights to support business decision-making and performance evaluation.
- **Technologies used:** Power BI, Power Query, DAX, Data Cleaning, ETL

EXPERIENCE

Industrial Intern | Techno Exponent (Euphoria Genx) , Kolkata

Aug - Dec '2025

Data Analytics with Power BI

- Gained hands-on experience in data analytics, dashboard development, and business intelligence reporting, applying analytics techniques to transform raw data into actionable insights.
- Developed an E-Commerce Sales Analysis dashboard using Power BI to analyze sales performance, customer trends, and regional insights, and delivered data-driven recommendations to support business decision-making.

CERTIFICATES

Python for data science

OCT '2025

Issued by : NPTEL & IIT Madras

Completed an intensive **4 week course** on Python for Data Science. Earned an **Elite + Silver** certification for finishing in the top tier of the course. Mastered Python libraries like NumPy and Pandas for data manipulation. Learned to clean messy datasets and build predictive machine learning models.

PROFESSIONAL SKILLS

- **Communication:** Verbal and Written Communication
- **Problem Solving:** Critical Thinking and Decision Making
- **Analytical Thinking:** Data Interpretation and Insight Generation
- **Teamwork:** Collaboration and Relationship Building
- **Attention to Detail:** Accuracy and Quality Focus

LANGUAGES KNOWN

- Bengali
- English
- Hindi

INTERESTS

- Reading Books
- Solving Logical and Analytical Puzzles
- Public Speaking and Delivering Presentations
